

I benefit greatly by listening to XM Satellite Radio. It provides much needed variety in an area currently served by music I don't want to listen to and removes the commercials I never wanted to listen to in the first place. I can listen to jazz, rock, dance, or even hear comedy routines - not something I can do on FM.

More importantly, I pay for these services. I do not want the National Association of Broadcasters to dictate what I am permitted to hear. I will not have something I willingly pay for become limited.

I urge the FCC to reject petition 04-160.
